BLUTOP protection sleeve objective is:

- Creation of a space between the shafts in order to protect the pipe during transport
- Creation of a protection for the pipe junction.

BLUTOP sleeve is placed on the spigot of the pipe.

BLUTOP sleeve must fit without any effort on the socket side and must stay in place.

Material:

Cloth: PP woven + PE laminated. Colour: blue (RAL 5012).

Rubber band: rubber.

Spacing ribbon: PP textile strapping.

Sewing filament: polyester.
